**Southwestern
College**

Jump start your career or college education

The articulated 2+2+2 Design Engineering and Drafting Technologies Program puts you at the head of the pack from the get-go. Right away, you can take that training to the streets in a good-paying career as an engineering technician. Or build on those studies at a state university, moving up to a Bachelor's degree in engineering and moving on to a high-paying professional career.

job**

Southwestern College
ATTN: Design/Drafting Technologies
900 Otay Lakes Road
Chula Vista, CA 92010

emand for qualified design and drafting technicians increases daily as technology becomes more complex.

You can draw on the 2+2+2 Engineering Program to help you design a rewarding career that will help you shape the future. In just two years, you can:

- learn the easily understood fundamentals of engineering
- accumulate hours of hands-on experience with the latest computers and equipment
- apply your skills to practical, real-world projects

The engineering program is staffed by industry professionals. They know what you need to make the grade in college and in the marketplace. Hundreds of options are available within the broad career paths that will open for you with your Associates degree in Engineering Design or Drafting Technology.

- Engineering Design emphasizes the theoretical aspects that will help you turn your bright ideas into solid products
- Engineering Drafting focuses on the skills and computer resources you can use to change visions into applications

Train on the latest equipment

Southwestern College has three laboratories providing the latest Computer-Aided Design (CAD) and Manufacturing (CAM) hardware and software. Gain hours of experience on IBM-compatible computer systems just like those used in industry.

Low cost

Standard fees apply — \$5 a unit for California residents, or \$50 a semester for 6 or more units. Financial aid is available, as well as career counseling, health services, veterans' assistance, and other services.

Explore your options

Investigate the opportunities the 2+2+2 Engineering/Technology Program offers. An Associates degree will equip you with all the skills you need to find a good-paying job. Or you can continue your education at a state university. In either case, the 2+2+2 Program can help prepare you for a rewarding future and open the doors of local employers in these area industries:

- Aeronautics and Aerospace
- Electronics
- Manufacturing
- and many others

Start now

It's easy to get into the program. There are no waiting lists. Admissions are on a first-come, first-served basis.

For more information on the 2+2+2 Industrial Engineering Technology Program, stop by the Southwestern College Admissions Center at 900 Otay Lakes Road, Chula Vista, CA 92010. Or call the college's Department of Engineering and Applied Sciences at the number below.
